## Thermal Pot Tags

**Thermal Material (ZX) 13 mil (White only)**

**Styrene Material (SX) 20 mil**

**Heavy Plastic Material (PX) 24 mil**

The following tags can be pre-printed with the hot stamp or thermal transfer printing method both processes are dry printing methods and will last in the sun for several years.

When selecting a thermal pot tag take into account the environmental conditions and the length of time the tag will be subjected to the environment.

Styrene (SX & ZX) is best used when the requirement is less than 6 months. Styrene is impacted by UV exposure and cold temperatures more than polypropylene which can last up to 1 year or longer in certain conditions.

Please note: All measurements for products are in inches

PX5152T • SX5152T • ZX5152T
