

Thermal Signs

Rigid Material (NC) 10 mil

Features:

Sign stock is ready for immediate insertion into the sign holders

Floratherm (FT) 3.2 mil

Features:

The floratherm material is designed with an aggressive adhesive and top coated face stock that resists water and sunlight while providing a superior thermal transfer print surface. The labels can be applied to smooth damp containers, flats and trays with excellent results. Signs may be preprinted with decorative borders and your company name or logo. They can also be flood-coated to create additional color options.
